🔗 SUMMARY

Aspiring Computer Science Engineer proficient in Full-Stack Development and AI/ML. Skilled in Python, Java, React.js, Flask, Django, LangChain, and RAG systems. Built multiple end-to-end web and machine learning applications. Seeking a Software Engineering or AI role to deliver impactful solutions.

🎓 EDUCATION

Intermediate, Sri Chaitanya Junior college 2020 – 2022
94.5 % Hyderabad , India

B.Tech(CSE), Gokaraju Rangaraju Institute of Engineering & Technology 2022 – 2026
9.32 CGPA Hyderabad, India

🧠 SKILLS

Programming Languages: Java, Python, SQL, Go

Frameworks & Technologies: Flask, React.js, Django, JavaScript, REST APIs

Tools & Platforms: Git, GitHub, Postman, Linux, VS Code, Hugging Face, LM Studio

Databases: MySQL, SQLite

Machine Learning & AI: Pandas, NumPy, Scikit-Learn, Transformers, LangChain, LangGraph, FAISS, Ollama

Concepts: Data Structures & Algorithms, Object-Oriented Programming, DBMS, Operating Systems, Web Scraping, RAG, Computer Networks

📁 PROJECTS

An AR Framework for Code Explanation & Evaluation 📄,

Python, Flask, AI/ML, Augmented Reality, OpenCV, Graph Neural Networks (GNN), AST, CFG

- Developed an AI-powered Augmented Reality educational platform that integrates semantic code analysis to deliver interactive programming visualization and intelligent feedback.
- Built a robust logic-based code evaluation system using Abstract Syntax Trees (AST), Control Flow Graphs (CFG), Graph Neural Networks, and Graph Edit Distance for accurate automated assessment and personalized learning recommendations.

No Code ML Model Training App 📄, *Python, Flask, Streamlit, Scikit-learn, TensorFlow, Keras, SQLite, REST APIs*

- Designed and developed a full-stack no-code platform that allows users to upload datasets, train, evaluate, and deploy Machine Learning and Deep Learning models through an intuitive web interface.
- Implemented multiple algorithms including Random Forest, Decision Tree, SVM, Gradient Boosting, Regression, ANN, and CNN with automated preprocessing, performance evaluation, and real-time prediction capabilities.

SponsorConnect, *React.js, Flask, Python, SQLite, REST APIs*

- Created a full-stack web platform that connects organizations with potential sponsors for project funding and collaboration.
- Implemented key features including user authentication, organization and sponsor profile management, project discovery, sponsorship listings, and secure communication through RESTful APIs.

🏠 EXPERIENCE

Skill Development Cell (SDC), *Educational Mentor*

Educate students about the courses our club offers and assist them in completing those courses by resolving any technical or course-related doubts they may have.

T-works, *Technical Team (Volunteer)*

Volunteered at Maker Faire in collaboration with T Works, Hyderabad, assisting in setup and operation of innovative prototypes, showcasing technical expertise.

📜 CERTIFICATES

— MySQL Certification : HackerRank

— Data Science for Engineers : NPTEL

— Introduction to MERN : simpliLearn
